A sense of proportion: solution

The strongest kilogram–for–kilogram weightlifter is the one whose data point lies farthest above the best fit line with slope $2/3$. This looks like Zhang, closely followed by Perepetchenov.

[Back to Outer space: Two's company, three's a crowd](#)

Plus is part of the family of activities in the Millennium Mathematics Project, which also includes the [NRICH](#) and [MOTIVATE](#) sites.
