

Constructing our lives

The mathematics of engineering

Millennium Mathematics Project

UNIVERSITY OF CAMBRIDGE

The Royal Academy of Engineering

Can engineering save the environment?

How do you construct an iconic building?

How does your body grow?

Can an intelligent tennis racket help your serve?

Why is the violin so hard to play?

+ plus
magazine

Uncover the maths behind engineering with Plus magazine. What do Gollum, the new Olympic stadium and the quest for sustainable energy have in common? They are all the work of engineers. Engineering provides some of the most exciting applications of maths, ones that impact on all our lives every day. Explore the maths behind engineering, learn about the latest research and hear from the experts themselves.
